But this question of the aposite charis re-elected in North Carolina it will actor of the college is one with which, rase fee number to forty-tour, while the question will be merior the Legisla of the p-sauge of a resecueble tariff bill ture in a spirit of fairness, the merits of with the aid of suct protection Demo the case considered honestly and equit- crate as Senator-chef McEnery, of Loably and a proper amount of ald voice; There are always two eldes to ever question and the argum ats in favor of the college will be isld before, the membera by those chesen to speak for it la due scaspu.

A Remarkable Assertion The meneration that the five thousand Ask for Carters, or more voters who were distrucchised in this State by reason of a failure on their part to grasp the details of bur complex ballot law, constitute a claswho are merely tools, in the hands of other men and therefore it la just as w that their votes should no count, is pot only ac . on warranted piece of . Impeticonce, but shows a lamentable amount of gnorance concerning the operation of the law. It is not the man who regards his voto as a meie motter of barrer that: To Provide a First-class Dinner makes mistakes in marking his ballot, as he is subjected to most thorough instruction, but the man who thirks he knows all about the law until he gets into the booth. We have heard gentlemen as bright as any in the State remark after deposition their ballot that they would like just one more look at it to eatisty themselves that it was correctly marked. No doubt some people like the system, but when t is contended that the system Is not complex, or is held that its features are castly understood, the advocates of he Australian-ballot simply weaken their own base. belrown case.
It has been the subject of contention

in the Courts and only last fall the legal method of marking the ballot was niscossed in this Singe, and men is ere directed to place two marks on the buildt in this city, the claim being made that a ballot marked in that way! would be counted, when as a matter of fact it would have to be thrown out innder the law. Yet the men who gave this advice were luterested parties and were anx outevery" ballot count. | They slimply did not understand the his. The Protadelphia Press' says The election of United States Sena ors to take place this week in a number of State Legislatures will help to determine Secure of the next Senate. In any loadances the result is already reshadowed by the facts that one of the other party has a clear mijority in the Legislature that is to cleet not has indeed on a caudidate. To other cases where the Legislature is close a dead-iock is probable and the postponement of an election for a longer or shorter time may occur. It is possible, however, even now to arrive at a general estimate of the strength of parties in the Senate of the Fifty-fifth Congress.

The terms of thirty Senators expire with the present Congress of whom fourteen are Republicans, closen are Democrats, three are Populities and two cut be classed as sliver independents.
